

Precision gripper

G15 + G30 for highest torque transmission

G15 + G30

G-gripper characteristics

- Type G grippers have a stop surface for a **controlled penetration** of the grip tooth.
- **The workpiece is clamped concentric on the stop surface**, so that the clamping dia. and the machining dia. are concentric.
- The **high precision** of the gripper guarantees concentricity even after replacing worn out grippers.
- Highest torque transmission is guaranteed with the **combination of friction and positive drive**.
- **TIN coated high speed steel** for long life.
- You can **select the corresponding gripper** for all applications according to the grindstock allowance.
- Gripper with **controlled penetration 0.15–0.30 mm** are standard.
- **Special grippers are available** on request.

G15 (light duty version)

material: HSS

SMW-AUTOBLOK type	G15-150	G15-200	G15-250
